

100% digital colour management.

The Phoenix Cloud makes it simple.

Spies Hecker – simply closer.

The Phoenix Cloud makes digital colour matching even more precise, accurate and easy to perform.

Thanks to digital technology, colour management using the Phoenix Cloud is reliable, user-friendly and clear. Making complex colour matching with conventional painted colour chips a thing of the past.

Wireless.

The Wi-Fi connection and the Internet-based colour formula database allow you to perform colour matching in the office or in the mixing room using your tablet, smartphone or PC. For maximum flexibility.

Up to date and accurate.

The vehicle's colour and effect are measured with a ColorDialog Phoenix spectrophotometer and compared with the Spies Hecker Internet database. So you get an optimal result based on more than 200,000 current formulas. For maximum accuracy.

Fast and efficient.

The colour formula can then be forwarded directly from any device (PC, tablet or smartphone) to an IP mixing scale such as the Sartorius PMA.Vision. That means the right colour can be mixed immediately. For faster work processes.

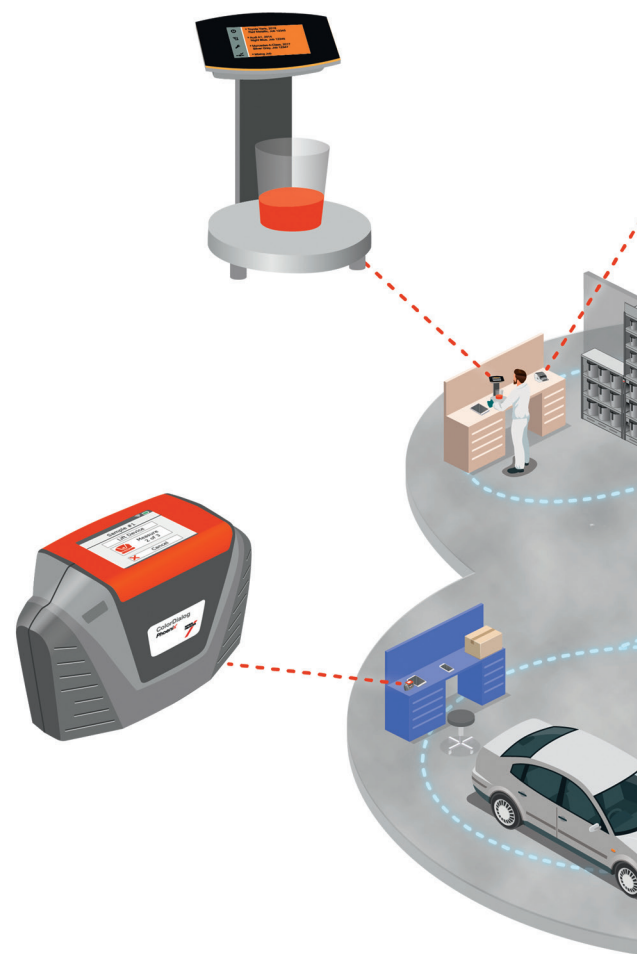

Safe and clear.

The Phoenix Cloud not only keeps all job data safe and secure but also provides you with a useful overview of key information at the end. For reliable information.

With the Phoenix Cloud Hi-TEC performance package, you have the best digital colour matching available.

It includes:

- a ColorDialog Phoenix spectrophotometer for accurate colour and effect measurement;
- the "Phoenix" web portal for colour matching using a constantly updated colour formula database;
- simple wireless data exchange with peripherals such as IP scales or IP label printers;
- Links to other functions such as warehouse and order management, online ordering, control of all key data, etc.

Digital colour management step by step

Depending on how digitised your business is already, you can use

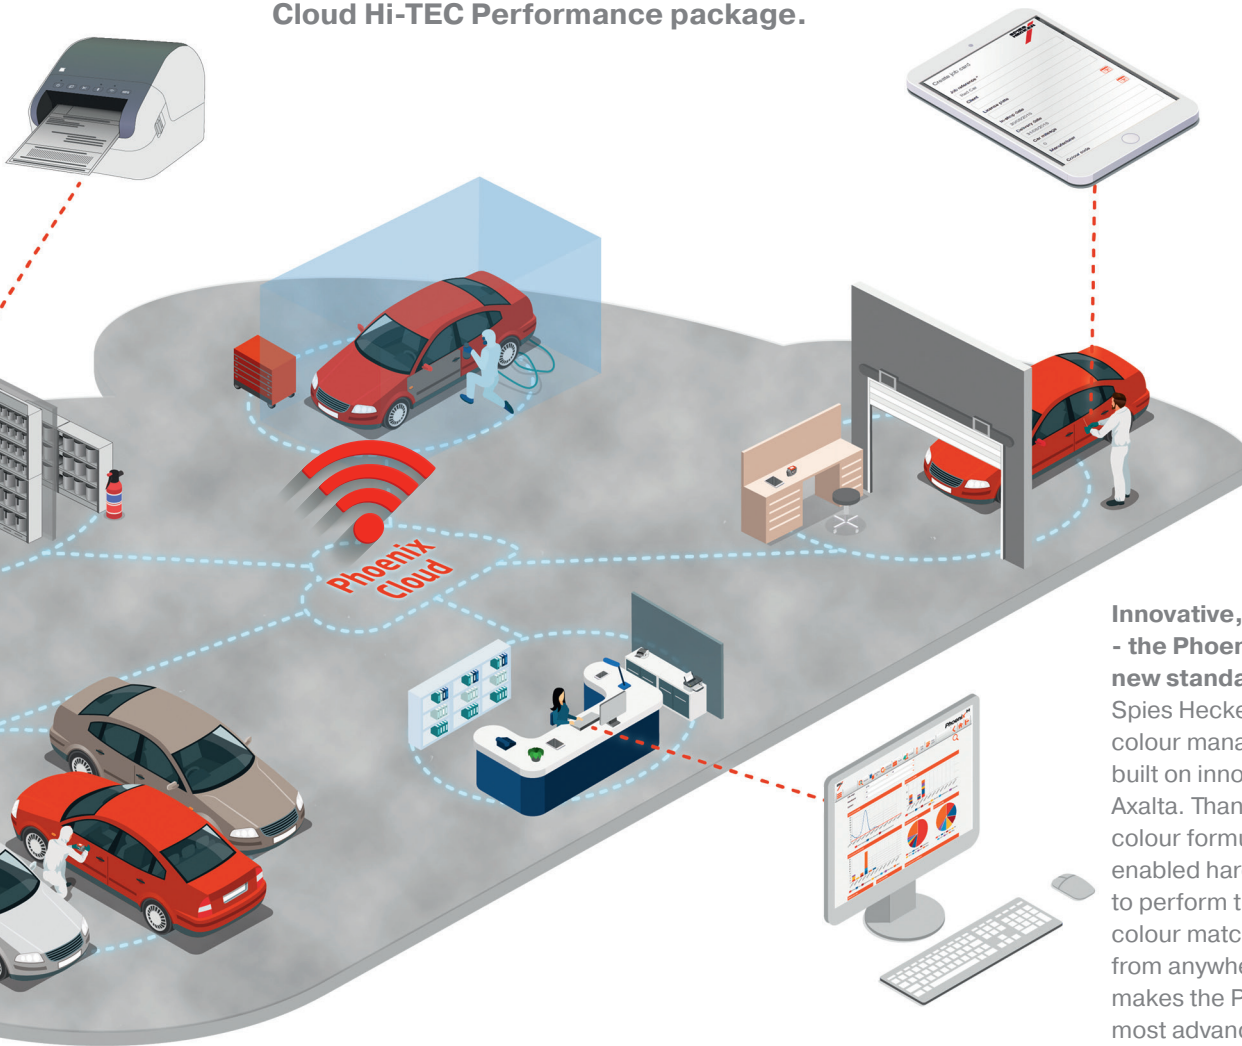

Phoenix Cloud Base

- ColorDialog Compact connected to PC via USB cable (scale, label printer via LAN or WLAN).
- Objective colour measurement

This means:

- full access to current colour formulas
- data protection in the Phoenix Cloud
- no maintenance
- simple network setup
- 100% digital colour management

Optimised colour management with Phoenix Cloud Hi-TEC Performance package.

Innovative, expandable, mobile - the Phoenix Cloud sets new standards.

Spies Hecker's Phoenix Cloud digital colour management packages are built on innovative technology from Axalta. Thanks to a web-based colour formula database and Wi-Fi-enabled hardware, it's now possible to perform the entire process from colour matching to colour mixing from anywhere in the bodyshop. This makes the Phoenix Cloud the world's most advanced colour management solution for paint shops.

Step – with Phoenix Cloud packages

different packages to build up your colour management capability step by step.

Phoenix Cloud Classic

- ColorDialog Phoenix wirelessly connected to the Wi-Fi network, comprising PC or tablet, scale and label printer

Additional benefits compared to the Phoenix Cloud Base package:

- optimal colour determination through colour and effect measurement
- extra convenience of charging station for ColorDialog Phoenix
- higher flexibility thanks to tablet or smartphone access
- the possibility to physically separate colour measurement from colour mixing

Phoenix Cloud Hi-TEC Performance

- ColorDialog Phoenix integrated into a WLAN network with IP scale (e.g. Sartorius PMA.Vision) and mobile devices (e.g. tablet, WLAN label printer)

Additional benefits compared to the Phoenix Cloud Classic package:

- full mobility (also via hot spot)
- no PC required in the mixing room
- open network connection – making it easy to connect multiple scales easily
- easy installation and no maintenance

Spies Hecker, one of the global refinish coating brands from Axalta Coating Systems, develops optimum and practical paint system solutions that can make bodyshop work easier and more efficient. With more than 135 years of success behind it, Spies Hecker's high-quality product systems, customised service and targeted training demonstrate its partnership with the refinish industry. Based in Cologne, Germany, it is one of the world's leading vehicle refinish brands, and is available in over 76 countries worldwide.
